

# PowerView™ Motorization

## › Launch Details

- Introducing PowerView™ Motorization, the newest innovation from Hunter Douglas is our most intelligent system yet.
  - All-new wireless technology.
    - > An increased RF range and the addition of two-way communication result in a more robust product.
  - PowerView Motorization merges seamlessly with your connected lifestyle.
  - Not backwards compatible with Platinum™ Technology (PowerRise®, PowerGlide® or PowerTilt™) products.
- PowerView Pebble™ Remote
  - Fashion meets function with the all-new PowerView Pebble Remote.
  - Available in seven on-trend colors.
    - > The Pebble Palette™ is artfully designed to personalize and harmonize with any home décor.
    - > Black Matte, Clear Frost, Citron, Cobalt, Pewter Frost, Poppy and White. The inner remote module is available in white or black, giving you a plethora of personalization options.
- PowerView Surface Remote
  - Fits to any wall for visually pleasing, wall-mounted control.
  - The sleek, matte finish complements any wall color.
  - Available in three colors.
    - > Black Matte, Nickel Matte, and White Matte.
- PowerView App
  - Designed to fit your lifestyle with customized control.
  - Create personalized settings (called Scenes) within one room, multiple rooms or throughout your whole home to create the right ambience for any moment.
  - Available on Apple® iOS devices and Android™ mobile devices.
  - Requires PowerView Hub for operation.
- PowerView Pebble Scene Controller
  - Works in conjunction with the PowerView App to provide immediate access to your personalized list of Scenes.
  - Use the scroll buttons and OLED screen to quickly select and activate a personalized Scene or select a Favorite Scene with one-button activation.
  - Also available in the PowerView Surface Scene Controller wall mount option.
  - Requires PowerView Hub for operation.

PowerView Pebble Remote and PowerView App.

## › Product Advantages

- Transform light and set the mood in your home with the press of a button or tap of a mobile device.
- Schedule the operation of your window treatments to optimize your home's energy efficiency.
- PowerView Motorization contributes to a safer environment for young children and pets.
- PowerView Motorization is the perfect solution for both newly constructed and existing homes.
- Battery and plug-in power options available.
- PowerView Pebble Remote re-invents remote control by creating an ergonomic fit, implementing more intuitive push button control, and adding "Favorite" position functionality.

## FREQUENTLY ASKED QUESTIONS

**Q: What Hunter Douglas products are available with PowerView™ Motorization?**

**A:** Alustra® Woven Textures®  
Applause® honeycomb shades  
Design Studio™ Roman Shades  
Designer Roller shades  
Designer Screen shades  
Duette® honeycomb shades  
Luminette® Privacy Sheers  
Nantucket™ window shadings  
Pirouette® window shadings  
Pleated shades  
Provenance® Woven Wood Shades  
Silhouette® window shadings  
Skyline® Gliding Window Panels  
Solera® Soft Shades  
Vignette® Modern Roman Shades  
Applicable Alustra Collection products

**Q: How do I know if my Hunter Douglas window treatments have PowerView Motorization?**

**A:** Any motorized Hunter Douglas window treatment listed above, manufactured after May 2015, is built with PowerView Motorization. Some exceptions may apply for special requests.

**Q: How many shades can I control using the PowerView App?**

**A:** You can control all Hunter Douglas PowerView motorized window treatments in a home from the PowerView App.

**Q: Can I operate my shades from anywhere in the world using the PowerView App on my Apple® or Android™ device?**

**A:** Yes, using the RemoteConnect™ feature. RemoteConnect must be enabled in your PowerView Hub and configured within the PowerView App settings.

**Q: Do I need an internet connection to set up the PowerView App to control my shades?**

**A:** No, an internet connection is not necessary.

**Q: Do Schedules automatically change for Daylight Savings Time (DST)?**

**A:** Schedules will adjust for DST automatically after you connect to the PowerView Hub using the PowerView App. The internal clock in the Hub will update to the current date and time.

**Q: What does the Favorite button do?**

**A:** A “Favorite” position can be created and set for every PowerView motorized window treatment in the home. The Favorite button is a quick and easy way to send shades to preset position(s) from a single press.

**Q: Do Hunter Douglas motorized shades have built-in WiFi?**

**A:** Hunter Douglas wireless control systems do not have built-in WiFi. All shades communicate via our patented PowerView protocol.

**Q: Can I use my new PowerView Pebble™ Remote to operate my PowerRise® 2.1 shades that I previously purchased?**

**A:** The new PowerView components use a different communication method from the previous Platinum™ Technology platform and cannot be used to control older Hunter Douglas products.

**Q: How many shades can I control using the PowerView Pebble Remote or PowerView Surface Remote?**

**A:** A PowerView Remote can be used to operate six shades individually or hundreds of shades as a group, as long as the shades can receive commands from the remote.

**Q: What is the PowerView Pebble Scene Controller?**

**A:** The PowerView Pebble Scene Controller works in conjunction with the PowerView Hub to quickly navigate and activate your personalized list of Scenes.
